DETAILED ACTION

This Office action is in response to applicant's supplemental preliminary amendment filed on 31 August 2004.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 18-28 are drawn to an exposure method of exposing a substrate to a pattern, classified in class 438, subclass 16.
 - II. Claims 29-33 are drawn to an exposure apparatus for exposing a substrate to a pattern, classified in class 250, subclass 499.22.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially

different apparatus, such as an apparatus that does not utilize the applicant's as-claimed setting system for alignment of the plurality of marks.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen W. Smoot whose telephone number is 571-272-1698. The examiner can normally be reached on M-F (8:00 am to 4:30 pm).
